

The Priority of Protection: Strengthening Our Safety Standards

The Team posing for photos after receiving their personal Workplace Safety: Dos & Don'ts Booklets.

A Commitment to Workplace Integrity

In any environment where craftsmanship meets machinery, the most vital component is the safety of the people involved. In conjunction with the Occupational Safety and Health (OSH) month, we are dedicating our focus to a comprehensive review and reinforcement of our workplace safety standards.

Building a Culture of Care

For us, safety is not merely a set of rules to be followed, but a culture of stewardship that we cultivate together.

DON'Ts

Merokok di dalam kawasan kilang

DO's

Merokok di kawasan yang ditetapkan

Makan di dalam kawasan kilang

Makan di tempat yang disediakan

A page from the booklet illustrating what to do and what not to do.

To bring these standards to life, our Occupational Safety and Health (OSH) Committee has developed a bespoke visual guide. The booklet documents the correct procedures for everything from machine operation and PPE to vehicle logistics. This ensures that our safety protocols are clear, practical, and consistently applied across every department.

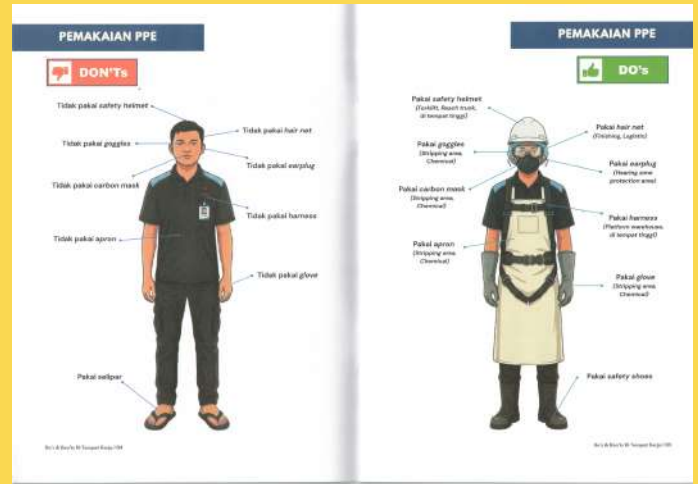

The Path Forward

Over the coming weeks, our team will engage in hands-on training to refine our skills in hazard prevention and operational safety. From the precision required on the production floor to the careful maneuvering of the forklift, we are sharpening our focus to ensure that excellence and safety remain inseparable.

We are returning to the fundamentals that define a safe workshop: the discipline of wearing ear protection, the stewardship of maintaining our machinery, and the integrity of following every SOP—whether it's keeping the floor dry, ensuring fire extinguishers are in their rightful place, or the simple act of turning off a switch.

By keeping our factory floor a focused environment—where even the smallest details like first aid care and weight limits are respected—we protect the craft we love.

To conclude this month of learning, every team member will undergo a final assessment to gauge their understanding of these vital protocols. This ensures that as a collective, we are not just informed, but fully prepared to uphold these standards in every task we perform. Doing things the right way, the safe way, every time.

A Note of Appreciation

A special thanks to our OSH Committee and our intern, Wan, for their dedication to making our workshop a benchmark for the industry.

We look forward to continuing our journey of excellence with you, ensuring that every project we deliver is backed by a team that is safe, sharp, and proud of the work they do.

Here's to a month of progress and a lifetime of doing things the right way.
